INDEX

At long last, the event you've all waited for! For the first time, all three volumes of Dr. Dobb's Journal *have been indexed and cross-referenced by subject. Roman numerals represent volume number; standard numbers represent issue. To order back issues, see page 50.*

General – Alphabetical

ALS-8
- III,7 Custom File Routines for ALS-8

APL
- II,7 The APL Core Project
- II,4 The Micro APL for 8080s

APPLE
- III,6 Lazarus: Program to Resurrect BASIC programs on Apple-II
- III,3 Renumbering & Appending BASIC programs on Apple-II

BASIC
- III,9 Quick and Dirty Functions for BASIC
- III,7 Shorter Printer Driver for Poly BASIC
- III,7 BASIC Renumbering Program
- III,6 Lazarus: Program to Resurrect BASIC programs on Apple-II
- III,3 Renumbering and Appending BASIC Programs on Apple-II
- II,7 Z-80 Patches for MITS BASIC
- II,6 BASIC Program to play LIFE
- II,6 SCHDL: A BASIC-coded daily reminder
- II,3 8080 Disassembler written in MITS 3.2 BASIC
- II,2 Modifications to MicroSoft 8.K BASIC 3.1 for Cromemco Z-80
- II,1 Lawrence Livermore Lab's 8080 BASIC
- I,9 A BASIC Terminal Exchange Problem
- I,7 Shooting Stars for Vitersyk's 6800 Micro-BASIC
- I,3 Yet Another BASIC Bombout!
- I,2 A Critical Look at BASIC
- I,1 Build Your Own BASIC

DAZZLER
- III,2 Absolutely Dazzling Dazzleware
- III,2 Dazzler Driver Subroutines and a "Chase"
- II,9 GRAFX: A Graphics Monitor for the 8080/TV Dazzler

ELF
- II,9 Utilities and Music on the COSMAC Elf

FORTH
- III,8 FORTH Dump Programs
- III,5 FORTH for Microcomputers

GRAPHICS
- III,10 Tiny Grafix for Tiny Basic
- III,4 The Oznaki "Life"
- II,10 New Voice Synthesis and Graphics Products at the Mini/Micro Show
- II,9 GRAFX: A Graphics Monitor for the 8080/TV Dazzler
- II,7 Curve Plotting on a TV Screen
- II,4 A KIM-1 TV Sketch Program
- II,3 Graphics on the Poly-88
- I,6 $98.50 Graphics Terminal Kit-SWTPC
- I,6 Homebrew TV Display with Graphics

HEATH
- III,10 Heath H-8 System
- III,8 Making a New Case for the Heath H9 Terminal
- II,10 Heathkit's H-8: A Consumer's View
- II,9 The Heath H-8: Pro & Con

IMSAI
- I,9 Assembling an IMSAI microcomputer
- I,6 A novice constructs an IMSAI

ISIS
- III,1 ISIS: Anatomy of a Real-World Operating System

KIM
- III,10 A Curve-Fitting Program Using a Focal Interpreter on KIM-1
- III,9 LEDIP: KIM/6502 Text Editor
- III,8 A Programmable IC Tester for KIM
- III,7 Fast Cassette Interface for 6502
- III,6 High Speed Cassette I/O for KIM-1
- III,5 EDITHA: A Revision of the Fylstra KIM-1 Editor Program
- III,3 A KIM Binary Calculator
- II,6 KIM-1 Breakpoint Routines: Plain & Fancy
- II,4 A KIM-1 TV Sketch Program

LANGUAGES
- III,10 Programming Languages & Standards
- III,5 Programming Language Translation Techniques

- III,3 A KIM Binary Calculator
- II,6 KIM-1 Breakpoint Routines: Plain & Fancy
- II,4 A KIM-1 TV Sketch Program

LANGUAGES
- III,10 Programming Languages & Standards
- III,5 Programming Language Translation Techniques

LAW
- III,8 New Computer Law
- II,7 PCF is Center for Personal Communications Law
- I,6 FCC Petition on ANSCII Transmissions by Hams
- I,5 Copyright Mania

LISP
- III,10 A LISP Interpreter for the 8080
- III,8 LISP for the M6800

MCS-80
- I,9 Octal Debugging for the MCS-80

MISCELLANEOUS
- III,10 BASEX: Interactive Compiler for Microcomputers
- III,8 Vocal Memory Dump
- III,5 Resident Memory Test Systems
- III,4 List Processing Unraveled: Pointers, Chains, Rings & Trees
- III,3 Status of the UCSD PASCAL Project
- III,2 Decoding Efficiency & Speed (Pros and Cons of Table Lookup)
- III,2 A Simple Technique for Static Relocation of Absolute Machine Code
- III,2 Relocation is Not Just Moving Programs
- III,1 Is your Assembly Language Program Well Structured?
- II,10 Mathpac: A KIMATH Supplement
- II,8 A Microprocessor Operating System: The Kernel
- II,7 Decoding 650X Opcodes
- II,7 About those ASCII TTYs You Cannot Trade For
- II,7 Real-Time Modification for Sanger's Video CHASE
- II,6 Conversions Between Octal & Hexadecimal
- II,6 Dompier Plus: A "musical keyboard"
- II,5 Jack Armstrong's Super Decoder Ring Revisited
- II,5 A Practical, Low-Cost, Home-School Microprocessor System
- II,4 The Characteristics and Decodability of the Universal Product Code Symbol
- II,4 Using an Acoustic Coupled Modem as a Bulk Storage Interface
- II,3 Extended Accuracy Arithmetic Routines
- II,3 A SC/MP Subroutine Supervisor
- II,3 The Selectric Typewriter as An Output Device
- I,10 Machine-Readable Programs in Magazine Format
- I,10 Use an Acoustic Coupler to Read/Write Tape Cassettes
- I,10 Thinking of Opening a Computer Store?
- I,9 First West Coast Computer Faire
- I,9 How to Code Jack Armstrong's Super Decoder Ring
- I,7 The Time for Floppys is Just About NOW!
- I,7 Proposed Hobbyist-Standard Bus Structure
- I,7 Remember those Secret Codes You Played With as a Kid?

MUSIC
- II,9 Utilities & Music on the Cosmac Elf
- I,9 Music by Computer
- I,8 Computer Control of Music Tapes for your Home Stereo
- I,8 More Mods to Comprer's Music Program
- I,7 Computer Music Bibliography
- I,5 Alpha-Numeric Music System
- I,3 Computer Process for Rapid Production of Musical Compositions
- I,2 Music of a Sort

NEWSPAPER/COMPUTERS
- III,9 Digicast Project

NORTHSTAR
- III,8 Dumping Northstar Disk Files

PILOT
- III,7 Common Pilot Progress Report—Pilot Micro Applications
- III,4 A Line Oriented Pilot Editor
- III,2 Mini Editor for 8080 Pilot
- II,7 Modifications to 8080 Pilot

POLY 88
- III,7 Shorter Printer-Driver for Poly Basic
- III,6 Autodump: Memory Dumper for P88 Tape System
- III,4 The Oznaki "Life"
- II,3 Graphics on the Poly 88
- I,10 Poly 88—An Excellent System

SAM-76
- III,10 Sam-76 Language Update No. 3
- III,6 Sam-76 Language Update No. 2
- III,3 Sam-76 Additional Comments
- III,1 The Sam-76 Languages

S-100 Bus
- III,6 Intelligent Terminal Implementation for The S-100 Bus
- III,5 Proposed Standard for the S-100 Bus
- II,1 A PDP-11-Like, 16-Bit Micro for the S-100 Bus

STD Bus
- III,10 STD Bus: A critical Look at a Proposed New Standard

TINY BASIC
- III,10 Tiny Grafix for Tiny Basic
- III,6 Tiny Basic Extensions Package
- II,2 String Handling for Pittman's 6800 Tiny Basic
- II,2 Extensions to Wang's Palo Alto Tiny Basic
- I,10 NIBL, Tiny Basic for National's SC/MP Kit
- I,9 Tiny Basic for the 6800
- I,9 Save & Load Mods to Pittman's 6800 Tiny Basic
- I,8 A "fix" for Denver Tiny Basic
- I,7 Games in Pittman's 6800 Tiny Basic
- I,6 Errors in and Improvements for Whipple & Arnold's Tiny Basic Extended (TBX)
- I,5 Palo Alto Tiny Basic
- I,4 MINOL-Tiny Basic with Strings in 1.75 Bytes
- I,3 Denver Tiny Basic for 8080's: 2d Version
- I,2 Tiny Basic Available for 6800
- I,2 Tiny Basic, Extended (Part 2)
- I,1 Tiny Basic, Extended (Part 1)

I,1 Corrected Tiny Basic K
I,1 Extendable Tiny Basic
I,1 Tiny Basic
I,1 Design Notes for Tiny Basic
I,1 Tiny Basic Status Letter

TINY HI
I,9 Tiny Hi

TINY ROBOT
III,5 Yet Another Body
II,10 An Interactive Programming Language for Control of Robots (II;text)
II,8 An Interactive Programming Language for Control of Robots (I; listing)

VOCAL
III,9 Data-Boy Speech Processor
III,8 Vocal Memory Dump
II,10 New Voice Synthesis and Graphic Products at the Mini/Micro Show
I,8 Unlimited Speech Synthesis for Home Computers
I,3 It Can Talk, but Can it Sing?

WORD PROCESSORS
III,9 POW: An 8080 Processor of Words

PROCESSORS
6502
III,9 LEDIP: A Kim/6502 Line Editor
III,7 Fast Cassette Interface for 6502
III,2 Decoding Efficiency and Speed
III,1 Memory Test for 6502
III,1 Challenging Challenger's ROMs
II,10 A KIM-1 Disassembler
II,10 MATHPAC
II,7 Decoding 650X Opcodes
II,7 High-Speed Memory Test Program for 6502
II,4 A 650X Program Relocator
II,2 Stringout Mods for Espinosa's 6502 Routine
I,8 A 6502 Disassembler
I,8 A number Game for the 6502
I,7 Floating Point Routines for the 6502
I,7 Lunar Lander for the 6502
I,3 Breakpoint Routines for the 6502

6800
III,8 EM8080: An 8080 Emulator for the 6800 Systems
III,8 LISP for the M6800
III,5 Resident Memory Test Systems: With an Example for 6800
III,3 STRUBAL: A Structured Basic Compiler
II,10 GPM For the M6800
II,6 6800 Circle Maker
II,6 An Example of an M6800-Based GPIB Interface
II,3 M6800 Disassembler
II,2 Pittman 6800 Tiny Basic
I,9 Tiny Basic for the 6800
I,9 Save & Load Mods to Pittman's 6800 Tiny Basic
I,9 Timer Routines for the 6800
I,8 How to Make 6800 Resident Assembler Work
I,7 Games in Pittman's 6800 Tiny Basic
I,7 Low-Cost 6800 Systems Software and Games
I,7 Shooting Stars for Vitersky's 6800 Micro Basic
I,2 Tiny Basic Available for 6800

8080
III,10 A Lisp Interpreter for the 8080
III,10 Binary Tree Manipulation on the 8080
III,9 POW: An 8080 Processor of Words
III,9 Whatis: Expression Evaluator for the 8080
III,8 EM8080: An 8080 Emulator for 6800 Systems
III,7 Compact 8080 Disassembler and Dumper
III,4 ACT: An 8080 Macroprocessor (II)
III,3 ACT: An 8080 Macroprocessor (I)
III,2 Mini Editor for 8080 Pilot
III,1 An 8080 Disassembler and Support Software for SOL
II,10 KAPIAR: An 8080 Macroprocessor
II,9 GRAFX: A Graphics Monitor for the 8080/TV Dazzler
II,7 Modifications to 8080 Pilot
II,7 An 8080 Tracer
II,5 Video Chase for 8080/VDM
II,5 Source Code for 8080 Pilot (II; listing)
II,4 A Micro APL for 8080s
II,4 Guide to 8080 Pilot (I; documentation)
II,3 8080 Disassembler written in MITS 3.2 BASIC
II,3 Tiny Linkage Editor for "Relocatable Code" on 8080s & Z80s
II,2 An 8080 Disassembler
II,2 8080 Subroutine Package, Pragmatic Systems
II,1 Lawrence Livermore Lab's 8080 Basic
I,7 8080 TECO and Floating Point Rack
I,6 Button, Button in 8080 Machine Code
I,6 A Classy 8080 Text Editor
I,6 Byte Saving Programming Tricks for the 8080
I,6 Bootstrap for 8080
I,4 System Monitor for 8080-based Micro
I,3 Denver Tiny Basic for 8080s
I,2 SCELBAL-A Higher Level Language for 8008/8080 Systems

8086
III,7 Intel 8086

8880
I,8 A Board to Expand 8880 Instructions

Z-8
III,6 Zilog Z-8

Z-80
III,7 1K Utilities Package for Z-80
III,6 Z-80 Disassembler in TDL 8K Basic
III,4 A 1K Debugger for the Z-80
III,3 A Z-80 Tracer
II,7 Z-80 Patches for MITS Basic
II,5 Nifty Z-80 Conversion for Altair and Imsai Computers
II,3 Tiny Linkage Editor for "Relocatable Code" on 8080s and Z-80s
II,3 Proposal for Standard Z-80 Code
I,7 Z-80: Coming on Strong
